

cd server/migrations esta nuestra migración con knex
knex migrate:latest para crearla.

Diseño de la base:

```
[mysql> show tables;
+-----+
| Tables_in_pedidos |
+-----+
| knex_migrations    |
| knex_migrations_lock |
| pedido              |
+-----+
```

```
[mysql> describe pedido;
+-----+-----+-----+-----+-----+-----+
| Field      | Type          | Null | Key | Default        | Extra          |
+-----+-----+-----+-----+-----+-----+
| id         | int unsigned  | NO   | PRI | NULL           | auto_increment |
| estado     | varchar(255)  | NO   |     | NULL           |                |
| nuevo_estado | varchar(255)  | YES  |     | NULL           |                |
| created_at | timestamp     | NO   |     | CURRENT_TIMESTAMP | DEFAULT_GENERATED |
| updated_at | timestamp     | NO   |     | CURRENT_TIMESTAMP | DEFAULT_GENERATED |
+-----+-----+-----+-----+-----+-----+
```
